EDUCATION

Hult International Business School Cambridge, MA 2023 – 2026

Bachelor of Business Administration, Major in Finance and Business Analytics (STEM) | **Full-Tuition Scholarship** | **3.5 GPA**

Coursework: Supervised ML, Python & Tableau, Regression Analysis, Financial Forecasting, Corporate Finance, Risk Management, Managerial Accounting, Decision Making with Python

Leadership: President, Hult Competition Hub; President, HULT FC; Head of Volunteers, HBS VCPE; Director of Social & Professional Events, Boston Arab Society

WORK EXPERIENCE

AnalytIQ Cambridge, MA

Founder Dec 2025 – Present

- Founded and scaled AnalytIQ, an AI-powered analytics learning platform converting static course materials into interactive coding exercises; drove 0-to-V2 product launch across dual professor and student portals, cutting estimated faculty content-prep time by 60%.
- Architected full-stack infrastructure (Flask, Supabase/PostgreSQL, vector search, GenAI orchestration) enabling automated exercise generation, real-time student feedback, and professor-customized course delivery at scale.
- Led product strategy and roadmap prioritization, launching AI-driven content automation that improved learning engagement while eliminating manual instructor workload across university-level analytics courses.

Blue Green Brands Hybrid

Business Intelligence and Analyst Intern Sept 2025 – Dec 2025

- Designed, built, and maintained BI dashboards and reports in Sigma and Power BI; extracted and visualized POS and inventory data to support executive decision-making and client-facing presentations.
- Collaborated with cross-functional teams on corporate strategy, go-to-market planning, and new product development, contributing market analysis and strategic insights on product packaging and positioning.
- Conducted financial and market analyses for client and prospect meetings; delivered ad hoc reporting and data visualizations that directly informed demand planning and business development decisions.

Blue Green Brands Hybrid

Data Migration and Analyst Intern Jun 2025 – Aug 2025

- Led a full-scale cloud data migration from a legacy GCP Sigma instance to AWS Sigma, completing 800+ workbooks, dashboards, and datasets within 2.5 months using SQL and Excel.
- Independently developed and executed the migration plan in a high-ambiguity environment; managed validation, QA, and reconciliation processes to ensure error-free, on-time data transfer with zero rollbacks.
- Acted as primary liaison between internal teams and client IT/BI stakeholders; delivered weekly updates, trained teams on migration procedures, and led resolution of all migration-related blockers.

PROJECTS

Football Player Value: Supervised Machine Learning [Colab]

- Analyzed player performance and market value data using Python; conducted EDA, feature engineering, and supervised ML modeling to identify key valuation drivers and benchmark players across positions, enabling data-driven talent evaluation.

Breast Cancer Diagnosis: Classification Case Study [Colab]

- Analyzed a breast cancer dataset using Python through structured EDA and feature selection; applied data preprocessing and classification techniques to identify patterns distinguishing malignant from benign diagnoses and communicated findings via clear visualizations.

TECHNICAL SKILLS

Analytics & Tools: Python, SQL, Tableau, Power BI, Power Query, Sigma, Heap, REST APIs, Machine Learning (ML), Workflow Automation

Financial Skills: Financial Forecasting, Financial Modeling, Budgeting, Scenario & Sensitivity Analysis, Demand Planning, Data Visualization

Data Skills: Data Cleaning, Data Analysis, Data Modeling, SQL Query Optimization, Feature Engineering, Data Migration, QA & Validation

Other: PowerPoint, Canva, SAP, Salesforce, AWS, GCP, Cloud Deployment, Application Monitoring
